The Latest Version of Goal Management

The Latest Version of Goal Management

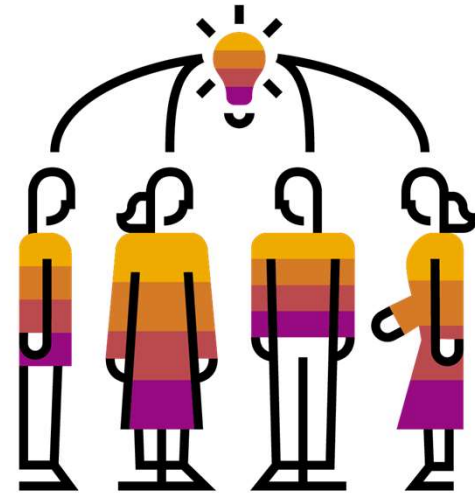

- Provides a new experience to set up, track, distribute, and manage goals in your organization.
- Upgrades the user interface to allow employees to more effectively set up and manage their goals and view their activities.
- Unifies the entrance to Performance Goals and Development Goals, enabling seamless navigation.
- Unclutters goal list views to make it easy to spot critical information, glean insights, and apply quick changes.

Feature Scope

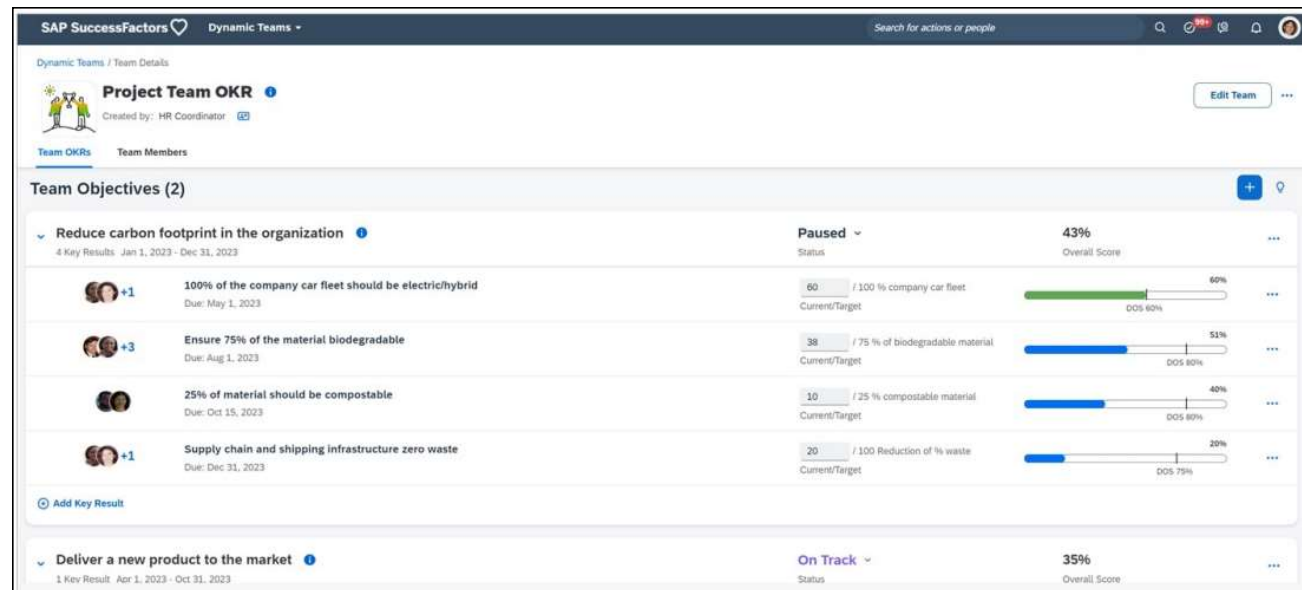

The Latest Version of Goal Management became generally available in 1H 2023 Release, and includes most of the main capabilities like:

- Team Goals
- Copy goals from a goal plan
- Goal Library
- Cascading
- Milestones
- Import Goals
- Metric Lookup Tables
- View Audit History
- Comments

Dynamic Teams

- The Dynamic Teams module enables people in your organization to create and manage dynamic teams and then define objectives and key results for the team.
- A dynamic team is not defined by the formal organizational hierarchy and reporting structure. Instead, it's formed by people coming together for a specific purpose.
- With Goal Management enabled, customers can allow team members to link the objectives of their dynamic team that uses the OKR methodology (Objectives and Key Results) to their own performance goals.
- Dynamic Teams is a platform feature available to all customers, from the Upgrade Center.
